

Ultimate Fighting Championship Winners

This visualisation presents an overview of Ultimate Fighting Championship (UFC) winners using a dataset of over 4000 UFC fights from 21 March 2010 to 15 August 2020. First, the presentation shows the popular fight locations and dominant weight classes by year and gender. Second, the visualisation shows the winners of fights with their winning methods. Third and final, the presentation shows the distributions of age and height of the winning fighters.

UFC seems to be most prominent in USA and the popularity increases over time. In terms of weight class, Lightweight and Welterweight seem to be dominant classes. Based on the dataset, Donald Cerrone has the most wins. Overall, taller and younger fighters appear to have won more.
